## **DETAILED ACTION**

### ***Oath/Declaration***

1. Receipt of the executed Declaration is acknowledged.

### ***Response to Amendment***

2. In response to the amendment filed 4/16/08 and further in response to the applicant's arguments, all pending claims have been allowed. It is noted claim 1 has been further amended by the examiner's amendment that follows to satisfy new guidelines concerning statutory process claims.

## **EXAMINER'S AMENDMENT**

- 3.. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with ATT. Francis Morris (Reg. No. 24,615) on 7/16/08.

The application has been amended as follows:

Please amend claim 1 as follows.

- Claim 1. A method performed by a computer of market making in an asset trading system, comprising the steps of.
- (a) receiving asset price data for a first asset;
  - (b) receiving current system position information for the first asset;

(c) receiving quote request information for the first asset;  
(d) calculating target position information for the first asset for each of one or more trading models; and  
(e) calculating with the computer a bid/ask quote in response to said received quote request information, said calculation of a bid/ask quote using a hedging method and being based on said asset price data, said quote request information, said current system position information, and said target position information.

---

***Allowable Subject Matter***

4. Claims 1-3, 5-22 and 24-38 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The claimed invention(s) pertain to asset trading over a computer network and more particularly to automated market making.

Closet prior art US Pat. 6,016,483 (Rickard et al.) teaches a method of determining theoretical option price. Rickard teaches a method and system that provides an automated simultaneous opening of trading on an open exchange. Rickard determines the opening prices for each option series so that all option series can be opened simultaneously on the option exchange.

Claims 1-3, 5-22 and 24-38 allowed because the closest prior art of record fails to teach suggest or render obvious the method of calculating bid/ask quote responsive to quote request information, wherein the calculation uses a hedging method and is based on asset price data, quote request information, a current system position information and a target position information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
